

# Tarea 04 Api.php

## Api tasks

The screenshot shows the Postman application interface. At the top, there is a header bar with a GET request to `http://127.0.0.1:8000/api/tasks`, a "No environment" dropdown, and various other buttons like Save, Share, and a Send button.

Below the header, there is a main content area with tabs for Docs, Params (which is selected), Auth, Headers (6), Body, Scripts, Tests, Settings, and Cookies.

The Params section shows a table for Query Params:

	Key	Value	Description	...	Bulk Edit
	Key	Value	Description	...	

At the bottom, there is a "Body" tab with a JSON preview. The response is a 200 OK status with the following JSON data:

```
1 [  
2 {  
3     "id": 1,  
4     "title": "qui et dolores",  
5     "description": "Tempora et inventore et illo possimus iusto. Maiores et  
6         est quis sit odit ipsa officia. Error quia ipsa nobis deserunt rerum  
7         nostrum.",  
8     "completed": false,  
9     "user_id": 1,  
10    "created_at": "2026-01-27T18:44:36.000000Z",  
11    "updated_at": "2026-01-27T18:44:36.000000Z"  
12 },  
13 {  
14     "id": 2,  
15     "title": "molestias saepe fugiat",  
16     "description": "Fuga ut qui et dolores. Tempora et inventore et illo possimus iusto. Maiores et  
17         est quis sit odit ipsa officia. Error quia ipsa nobis deserunt rerum  
18         nostrum.",  
19     "completed": false,  
20     "user_id": 1,  
21     "created_at": "2026-01-27T18:44:36.000000Z",  
22     "updated_at": "2026-01-27T18:44:36.000000Z"  
23 }]
```
